

```

void setup() {
  Serial.begin(9600); //initializing serial monitor
}

void loop() {
  char str[]="MALIHA NAWAR";
  int l=strlen(str);
  for (int i=0;i<l;i++)
    //for each character of the string
    {for (int j=0;j<=i;j++)
      //to show previous & present character
      {Serial.print(str[j]);}
      Serial.println();
      //to show previous & present character in new line
      delay(1000);}
    delay(1000000000000000);}

```
